Tamura-gun, Fukushima, 963-
7700, Japan
TEL : 0247-61-6129

Check here for the official website!

Measurements
During the winter season, the weather condition (such as snowfall) may prevent some monitoring posts and real-time dosimetry systems from measuring data. Also, when snow covers the ground, the air dose rate may temporarily decrease because radiation from the ground surface is shielded by the snow.
